

I am against even more rampant commercialization in football.

I am for a fairer distribution of TV and advertising funds, in order to strengthen the national competition in the relevant league.

I want fan interests to be considered when defining match days and kick-off times, considered and therefore respected.

I want the price of tickets and TV broadcasts to be set so the fans can afford them.

I'd boycott games and clubs that do not support and respect the fan-fair play ideas.

I'd boycott companies and / or their products, respect the „Fan Fair Play“ thought not.

I would support any initiative that pursues these objectives, and join it if necessary.

I support the Fan Fair Play spirit and national and international petition related to this.
